Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1.   (Currently Amended) A method in a mobile set for selecting data to be stored, comprising:

(a) displaying a plurality of recording modes, each recording mode for recording a different set of data frames exchanged between the mobile set and a second device during a phone call; [[and]]

(b) indicating a selection means for choosing a recording mode; and

(c) recording a set of data frames identified by a selected recording mode.

2.   (Currently Amended) The method of claim 1, further comprising ~~step (c)~~ providing a confirmation signal after a selection means for choosing a recording mode has been selected.

3.   (Currently Amended) A method in a mobile set for replaying recorded conversations, comprising:

(a) displaying a line indicating a data structure of ~~recroded~~ recorded conversations, the recorded conversations including data frames transmitted from the mobile set to a second device during a phone call, and data frames transmitted

from the second device to the mobile set during the phone call; and

(b) in response to selection of the displayed line, replaying a recorded conversation.

4.   (Currently Amended) A method in a mobile set, for replaying previously recorded conversations during a real time conversation, comprising:

(a) displaying a list of data structures representing recorded conversations, the recorded conversations including data frames transmitted from the mobile set to a second device during a phone call, and data frames transmitted from the second device to the mobile set during the phone call; and

(b) in response to selection of the displayed list, replaying at least a portion of a data structure.

5.   (Original)   The method of claim 4, wherein the displaying of a list of data structures can be accessed during a real time subscriber conversation using the mobile set without interfering in the communication between the subscriber and a base station.

6.   (Original)   The method of claim 4, wherein in response to a selection of the displayed list, a portion of a previously recorded conversation may be played back and transmitted through the uplink signal.

7.   (New)   The method of claim 1, wherein the set of data frames include speech data transmitted by the mobile set to the second device during the phone call.

8.   (New)   The method of claim 1, wherein the set of data frames include speech data received by the mobile set from the second device during the phone call.

9.   (New)   The method of claim 1, wherein the set of data frames include non-speech data.

10.   (New)   The method of claim 3, wherein the data frames include speech data.

11.   (New)   The method of claim 4, wherein the data frames include speech data.
